

Wall cover

When safety matters

Blast protection

Wall cover is a versatile and cost effective solution for protecting people within buildings from the damage caused by explosions. The product is capable of withstanding dangers resulting from a variety of threats, substantially reducing the high level of injuries and fatalities caused from falling and/or flying debris.

Rapid installation

The product requires minimal manpower and equipment to install. It can even be set up quickly by infantry troops in "hot zones" to the interior parts of buildings, as well as perimeter walls.

Discreet protection

The product can be fitted to any wall type, and can be made to resemble a regular wall's surface, making it suitable for use in both modern and historical buildings.

Features and benefits:

- Enhanced protection to walls with integrated blast-proof windows and doors.
- Environmentally friendly.
- Porous material maintains room ventilation.
- Can be painted with commercially available paint.
- Fire resistant.

Evidence-based technology

Countless blast tests and demonstrations have proven that Wall cover prevents structural fragmentation and projectile penetration into the interior part of a building.

These tests provide conclusive evidence that use of a Wall cover drastically reduces personal injury.

Why call anyone else?

Bringing in many different contractors to supply and fit a physical protection system is complicated and often does not give the best result. With Damasec, you don't have to. We find the best total solution and install it on your premises.

Ethical. Proactive. Confidential. Our values guide everything we do.
